

**YOUR SOURCE FOR STANDARD AND CUSTOM TRANSFORMERS  
AND MAGNETIC PRODUCTS**

- *Short lead times on custom made products*
- *Designs for the entire world market*
- *100 years of experience manufacturing*

# Company Overview and Highlights

## 2009 was our 100th Anniversary

Dongan Electric was founded in Albany New York in the year 1909. We moved to Detroit in 1911 to supply products to the young automobile industry at that time. Today we are still headquartered in the original plant however our manufacturing is now located in Pioneer Ohio. We also have manufacturing facilities in Italy, China and also a JV in India.

## Quality

Dongan is known for producing quality products in a timely manner to support our customers JIT philosophies. We test every single product along the way through the manufacturing process and a final test and inspection is completed on all our products before they are allowed to leave our factory.

## Our Mission

We provide competitively priced products that meet or exceed our customer requirements through continuous improvement and employee involvement.

## Quality Assurance

All of our facilities have implemented our own proprietary quality system which is modeled after ISO 9001:2000. Our units are designed to meet UL, CSA, IEC, ANSI and NEMA standards. All of our products are 100% tested before they leave the factory. We stand behind our quality with one of the best warranties in the industry on standard and custom products.

## Standard Products

We offer over 1500 standard cataloged items that are either in stock or can be shipped in as little as 3 days. We offer transformers that range in size from 50 VA through 500 kVA and from 600 volts down typically.

- Industrial control Transformers
- Energy Efficient Transformers
- Drive Isolation
- Transformers for Marine applications
- Hazardous Location Transformers
- Autotransformers
- Lighting Disconnects

## Sales Coverage

We have sales offices all around the country for local representation. You can find your local representative on our web site. We also sell around the world and have sales offices in some countries outside of the U.S.

## Inventory

We maintain inventory at our factory and in several warehouses around the U.S. We have locations in CA, AZ, CO, TX and NC.

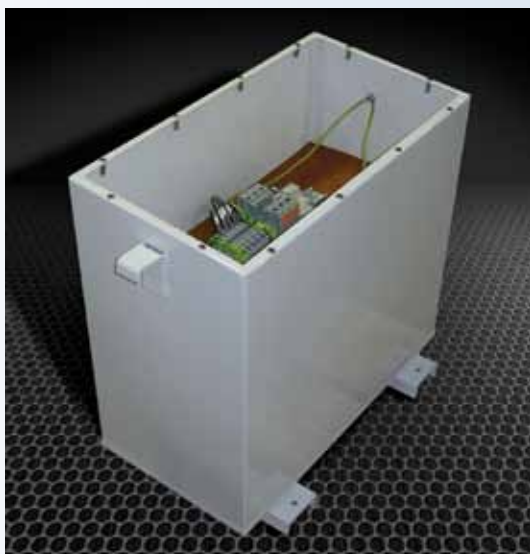

## Custom Products

We produce high quality custom products in 10 working days typical and have the capabilities to produce them in as little as 3 days. We offer these in ranges of 50 VA through 500kva, either enclosed or open core and coil units.

## Solar/Windpower

One of our fastest growing products are transformers for Solar inverter output and Windpower installations. These are specially designed for the heavy duty requirements of the solar inverter and wind farms. We design these to meet customer dimensions and voltage combinations as well as provide special terminations and paint color schemes.

## Customer Service

We pride ourselves on our customer service. Our team is ready to assist you in answering your questions about stock checks, order status, quotations or technical information.

## Engineering

- Over 10,000 custom designs on file
- We have several design engineers and technicians to design what you need
- Computerized design program
- We use AutoCAD for drawings
